ABDUL KHOLIK

Staff Process Engineer | Process Improvement | Data Analysis | Production Automation
Jakarta, Indonesia | abdulkholikk953@gmail.com | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Staff Process Engineer with 4+ years of progressive experience in computer manufacturing, beginning in production quality control, moving through technical troubleshooting, and advancing into Process Engineering. Skilled in process analysis, cycletime study, line balancing, production trials, KPI monitoring, root-cause follow-up, work-instruction control, and manufacturing digitalization. Combines shop-floor experience, data analysis, and software development to create practical systems that strengthen visibility, traceability, standardization, and operational control.

SELECTED OPERATIONAL CONTRIBUTIONS

- Built 11 operational dashboards and internal systems covering production, quality, maintenance, inventory, repair flow, PPIC, work instructions, and hardware validation.
- Integrated targets, hourly output, WIP, rework, loss time, and line performance into a Production & Leader Dashboard for faster status review and daily coordination.
- Digitized work instructions by product, model, process, station, work step, visual standard, tooling, cycle time, and revision history to improve standard access and document traceability.
- Developed Clone Scanner to automate SSD/NVMe post-cloning validation for serial number, firmware, health, capacity, and Windows build, reducing repetitive checks and improving consistency.
- Created stock and material-control workflows with item masters, requests, inbound and outbound transactions, alerts, reporting, and access control to improve visibility and traceability.

CORE COMPETENCIES

Process Engineering: cycle-time study, line balancing, bottleneck review, process-flow improvement, production trials, standard work, work instructions, and process documentation
Production Performance: output, efficiency, productivity, downtime, loss time, WIP, rework, KPI monitoring, data analysis, and dashboard design
Problem Solving & Standardization: root-cause analysis, corrective-action follow-up, abnormality handling, visual standards, revision control, and cross-functional coordination
Digital Manufacturing: internal web systems, production automation, traceability, quality systems, maintenance tracking, inventory workflows, repair flow, PPIC monitoring, and digital reporting
Technical Tools: PHP, MySQL, SQL, JavaScript, Python, Java, Microsoft Excel, database design, and responsive web applications

PROFESSIONAL EXPERIENCE

Staff Process Engineer | PT Tera Data Indonusa Tbk (Axioo) | Jakarta
Jul 2025 - Present

- Perform process analysis, cycle-time studies, line balancing, bottleneck review, production trials, and follow-up actions across notebook and computer assembly operations.
- Create and maintain work instructions, process flows, visual standards, revision controls, and operational documentation for production use.
- Monitor output, efficiency, productivity, downtime, loss time, WIP, rework, and related KPIs to support daily performance review and decision-making.

- Develop internal PHP, MySQL, and JavaScript systems for production reporting, KPI monitoring, IPQC/OQC, maintenance, inventory, repair flow, PPIC, work instructions, and traceability.
- Support root-cause analysis, corrective-action execution, abnormality follow-up, and coordination with Production, Quality, Maintenance, PPIC, and Engineering teams.
- Translate shop-floor requirements into practical digital tools that strengthen data visibility, standardization, and operational control.

Production Operator - Quality Control | PT Tera Data Indonusa Tbk (Axioo) | Jakarta
Apr 2024 - Jul 2025

- Performed visual and functional inspection, product validation, and standard-compliance checks for notebook and computer products.
- Recorded abnormalities, escalated findings, and supported defect containment and verification with production and technical teams.
- Worked against daily output and quality targets while maintaining disciplined documentation and line coordination.**Technician | PT Tera Data Indonusa Tbk (Axioo) | Jakarta** Dec 2023 - Apr 2024
- Diagnosed hardware and functional failures, performed troubleshooting and repair, and verified units after corrective work.
- Documented findings and coordinated with Quality Control and Production when recurring issues required additional analysis.**Production Operator - Quality Control | PT Tera Data Indonusa Tbk (Axioo) | Jakarta** Apr 2022 - Dec 2023
- Conducted product inspections and functional checks while supporting production output, quality standards, and line collaboration.
- Built a strong foundation in production discipline, defect identification, standard compliance, and shop-floor communication.

SELECTED DIGITAL MANUFACTURING PROJECTS

Production & Leader Dashboard | *Production Analytics*
Consolidates targets, hourly output, WIP, rework, loss time, and line performance into one operational view for faster review and coordination.

Digital Work Instruction System | *Process Standardization*
Structures instructions by product, model, process, station, work step, visuals, tools, cycle time, and revisions to improve standard access and document control.

Cleaning Stock Management System | *Inventory Control*
Connects item masters, stock requests, incoming and outgoing transactions, alerts, reports, and access control for stronger stock visibility and traceability.

Clone Scanner - SSD / NVMe Detector | *Production Automation*
Automates storage detection and validation for serial number, firmware, health, capacity, and Windows build after the cloning process.

Additional Systems | *Operational Dashboards*
Production KPI, maintenance summary, manpower cost, PPIC in-transit material, repair flow, IPQC findings, and OQC quality dashboards.

EDUCATION

Bachelor's Degree Candidate, Informatics Engineering | Universitas Pamulang | In Progress
Relevant areas: software development, databases, mobile applications, artificial intelligence, Internet of Things, and data-driven systems.

Vocational High School - Software Engineering | SMK Doa Bangsa Palabuhanratu | 2019 - 2022

CERTIFICATIONS

- Vocational Competency Certificate - Software Engineering
- HTML and CSS Certificate - ITS

• Industrial Internship Certificate - PT Mabito Karya

ADDITIONAL INFORMATION

Professional Focus: Process Engineering, process improvement, data analysis, production automation, manufacturing digitalization, and continuous improvement
Industry Experience: computer and electronics manufacturing; production operations; product quality; technical troubleshooting
